

SO MUCH MORE THAN JUST A DAILY MULTI-VITAMIN

By definition, *neuroprotection* is an effect that may result in:

- salvage
- recovery
- regeneration

of the nervous system:

- its cells
- structure
- function

Is CBD neuroprotective?

CBD has antioxidant and neuroprotective properties. The National Institute of Health holds these patents for till May of 2019. Of the 190 plus cannabinoids so far identified, Cannabidiol (CBD) is among the most exciting because of its antioxidant and neuroprotective properties.

Endo-Cannabinoid System

- Receptors found throughout the body
- Majority in the brain, immune, and cardiovascular systems
- Our bodies were built to need and use cannabinoids regularly
- Needed daily, like Vitamin C, for on-going health and vitality

Endo-Cannabinoid System
